‘Teman Ngopi’

‘Teman Ngopi’ is a website for a coffee shop based in Daegu, Korea

Group 6

Prepared by all the team members

No	Name	Matric Number
1	Muhammad Aiman Syakirin bin Mohd Fauzi	2010391
2	Muhamad Alif Izzummy bin Mohamad Radhi	2011291
3	Kay Aiman Fitri bin Kamarudin	2017189
4	Airil Bazil bin Azamin	2017833
5	Eddabalki Jawad	1722627

Supervised by Dr. Aidrina binti Mohamed Sofiadin

1. Project Description

To introduce our project, we would like to inform you that the theme we chose is foods and beverages which is widely known in our society right now. Hence, the topic of our project that we decided on is to make a website for a coffee shop. There are many articles and contents on social media about coffee shops being attractive to the public. Therefore, the objective of our website is to take orders from the customer with an aesthetic and professional design.

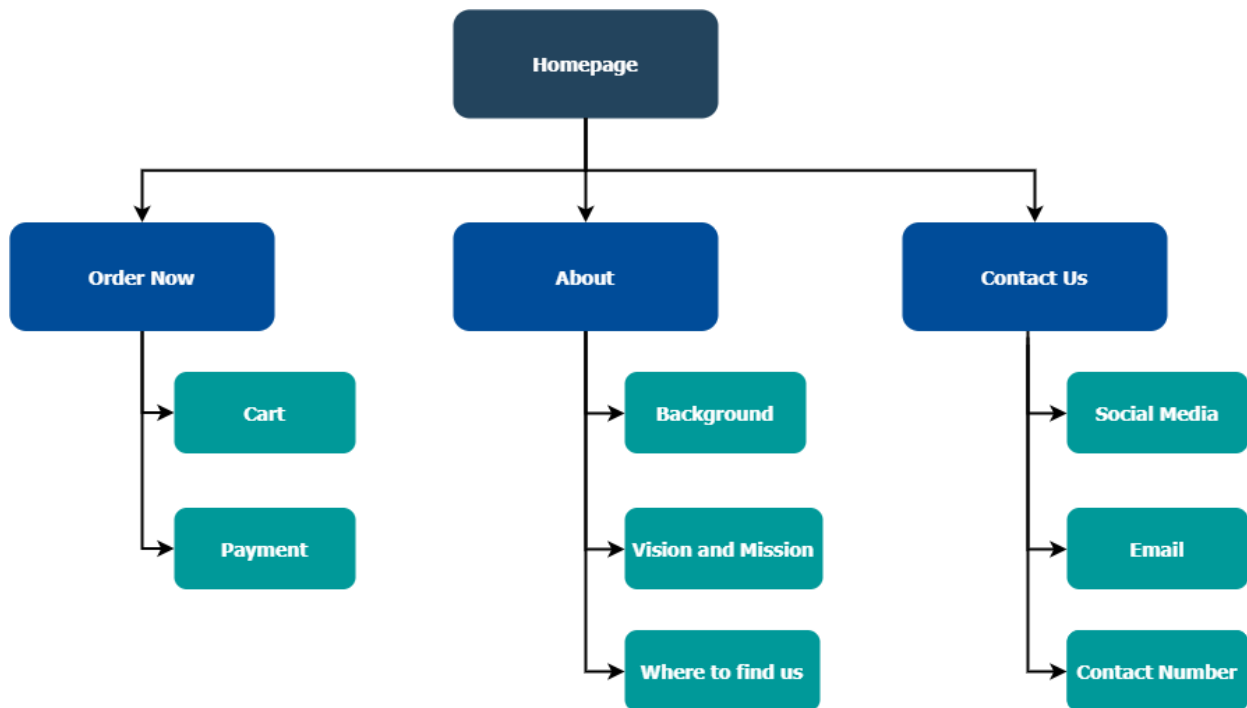

Furthermore, to fulfil the sustainable development goals, the cups we are serving are 100% made of paper and no straw will be given. It is to avoid the excessive usage of plastics and to ensure the environment is safe from plastic pollution.

The reason we are doing this topic is to take the opportunity of the coffee shops being viral during this pandemic time. This is the perfect time to test our skills in web development to attract customers as much as possible. While having the wonderful opportunity, there will also be a problem. As we are building this project, we need to compete with the existing websites that have their name well known over the world. By that challenge, we will improvise the project to be different from the others.

As for the progress, this project will be divided into two parts. The first part is where the project description, project sitemap and mock-ups will be discussed and developed by our group members. The mock-ups will consist of five sections which are the homepage, menu, ordering page, about our website and the information of our members. After that, the second part of the project will take over as we will code and create the desired mock-ups, like we did in the first part. The estimated time for our project to be completed is about two to two and a half months because we need to be detailed with every aspect of the project.

To put it into simpler words, the purpose of our project is to ease the coffee lovers to buy coffee by taking their orders online and give the flexibility for them to choose whether the coffees need to be delivered or they will pick it up themselves.
